Specific Program Documentation

1.	The CA software program(s) ("CA Software") listed below is provided under the following terms and conditions in addition to any terms and conditions referenced on the Order Form entered into by you and the CA entity ("CA") through which you obtained a license for the CA Software. These terms shall be effective from the effective date of the Order Form.

2.	**Program Name: CA LISA® Pathfinder**

3.	**Specified Operating Environment**

The CA Software's specifications and specified operating environment information may be found in Documentation accompanying the CA Software, if available (e.g., a user manual, user guide, or readme.txt or notice.txt file).

4.	**Licensing Model**

CA LISA® Pathfinder is licensed by the number of Concurrent Users, identified as a Power User or Runtime User.

"Concurrent User" means a software license that is based on the number of simultaneous (concurrent) users accessing the program. The software does not prohibit additional users from access, but does log a license exception for auditing purposes. Customer is entitled to have the specified number of Concurrent Users access the software simultaneously.

"Power User" means a Concurrent User who has administrative privileges, creates, edits and manages Pathfinder assets such as virtual services, test cases and test data. Each Power User includes one CA LISA Test User and unlimited Pathfinder Servers.

"Runtime User" means a Concurrent User who has limited rights to see the transactions but may not generate any assets. This user is a consumer and benefits from Pathfinder generated assets. Pathfinder Runtime Users have access to CaseGen functionality.

5.	**Third Party Terms**

If the CA Software contains third-party software components, and the third-party licensor requires incorporation of specific license terms and conditions for such software into this CA license, those third-party software components and their specific terms and conditions, which are incorporated by this reference, are set forth in the Third Party Terms document located at https://support.ca.com/prodinfo/tpterms
