

CA Aion Business Rules Expert 11.0  
CA RS 1312 Service List

Release	Service	Description	Hiper
11.0	RO54328	MULTIROW FETCH NON-OPERATIONAL WITH INDIRECT SQL	
	RO54330	MULTIROW FETCH NON-OPERATIONAL WITH INDIRECT SQL	
	RO63395	S906 ABEND PERFORMING CSVINFO MACRO IN RESYSB0	
The CA RS 1312 service count for this release is 3			

CA Aion Business Rules Expert  
CA RS 1312 Service List for CEF6B00

FMID	Service	Description	Hiper
CEF6B00	RO54328	MULTIROW FETCH NON-OPERATIONAL WITH INDIRECT SQL	
The CA RS 1312 service count for this FMID is 1			

CA Aion Business Rules Expert  
CA RS 1312 Service List for CEF9B00

FMID	Service	Description	Hiper
CEF9B00	RO54330	MULTIROW FETCH NON-OPERATIONAL WITH INDIRECT SQL	
	RO63395	S906 ABEND PERFORMING CSVINFO MACRO IN RESYSB0	
The CA RS 1312 service count for this FMID is 2

 CA RS 1312 - PTF RO63395 Details

Release	Service	Details
11.0	RO63395	<pre> RO63395  M.C.S. ENTRIES = ++PTF      (RO63395) DESC      (S906 ABEND PERFORMING CSVINFO MACRO IN RESYSB0) /*----- PRODUCT: CA AION Business Rules Expert RELEASE: 11.0 DATE:     27 SEP 2013 HYPER:    NO STARTRAK PROBLEM PRODUCT NAME: AIONBR  PROBLEM NUMBER:    941 ----- S906 ABEND PERFORMING CSVINFO MACRO IN RESYSB0 ----- Any Aion application may terminate unexpectedly. The base Aion system module is issuing a CSVINFO macro call to acquire information about the operating environment when the underlying environment definitions are being updated. SYMPTOMS: Application terminates unexpectedly. An S906 abend is reported with an RC=100. IMPACT: The Aion application must be resubmitted. CIRCUMVENTION: None. PRODUCTS AFFECTED: CA Aion Business Rules Expert r11.0 -----*/.  ++VER      (Z038)      FMID(CEF9B00) SUP        (T54R084). ++HOLD(T54R084) SYSTEM REASON(ACTION) FMID(CEF9B00) DATE(13177) COMMENT( Product:   Aion BRE for z/OS                      Release: 11.0 Sequence:  The following instructions should be executed after the associated maintenance has been successfully SMP/E applied. Purpose: Applying the associated maintenance has produced updated images of the RESYSB0 and RXSYSB0 executables in the CEF9PLD1 SMP/E target library. To realize the benefits of the changes associated with the maintenance, the updated images on the executables must be deployed out of the SMP/E target library into the installation's Aion product base load library. Relevance: The benefits associated with the maintenance can only be realized by effecting the deployment. Knowledge Required: To successfully execute these steps you should be familiar with techniques for copying SAMPJCL from the CEF9JCL target library to a work library, you should be sufficiently familiar with JCL to follow the setup instructions and execute the job. Access Required: To successfully execute the deployment JCL, you will need READ access to the CEF9PLD1 target library and UPDATE access to your installation's Aion product base load library. Steps to Perform: 1. Backup the affected members in your Aion BRE for z/OS r11.0 product base load library prior to deploying this solution. 2. Once this solution is applied, to deploy the associated changes, SAMPJCL member EF900941 should be copied out of the CEF9JCL target library, customized, and executed. The SAMPJCL member can be customized to deploy the affected product elements into a new test dataset or to overlay the affected product elements in the existing product library. For more information, please refer to the "Deployment Process - Aion Specific Maintenance" section, of the "Configuring Your Product" chapter, in the </pre>
