The CA RS 1401 service count for this FMID is 1			

CA Workload Automation CA 7 Edition 11.3  
 CA RS 1401 - PTF RO65075 Details

Release	Service	Details
11.3	RO65075	<p>RO65075 M.C.S. ENTRIES = ++PTF (RO65075)</p> <p>SASSSO30 - S02A USING PSP=Y / BAD RPL</p> <p>PROBLEM DESCRIPTION:            A S02A abend can occur trying to submit a job if a CA 7 control block is not set right (RPL contains an incorrect pointer). The problem is very timing dependent, but if it does occur, then CA 7 comes down and has to be restarted. This fix will cause only a subtask in CA 7 to abend, and the subtask will be automatically restarted with a rebuilt control block.</p> <p>SYMPTOMS:            S02A abend.</p> <p>IMPACT:            CA 7 outage.</p> <p>CIRCUMVENTION:            None.</p> <p>PRODUCTS AFFECTED:            CA 7 r11.3</p> <p>PRODUCT(S) AFFECTED: CA Workload Automation SE <span style="float: right;">Release 11.3</span></p> <p>Star Problem(s):            7 3076</p> <p>Copyright (C) 2013 CA.
