CA Easytrieve Report Generator 11.6
 CA RS 1405 - PTF RO68429 Details

Release	Service	Details
11.6	RO68429	<p>RO68429 M.C.S. ENTRIES = ++PTF (RO68429)</p> <p>EZABX009 PRINTING FIRST TITLE LINE OF REPORT</p> <p>PROBLEM DESCRIPTION: Error EZABX009 encountered when printing the TITLE line for the first report of an activity.</p> <p>SYMPTOMS: Error EZABX009 printing the TITLE line for a report.</p> <p>IMPACT: Program terminates with error.</p> <p>CIRCUMVENTION: The problem only occurs when the last reference to a field in the activity is subscripted. Any change that causes the last field reference to be to a field that is not subscripted will prevent the problem. For example, if the TITLE statement contains a literal, create a working storage field to contain the value of the literal and replace the literal with the new field on the TITLE statement. Adding the FILE keyword to the REPORT definition will prevent the problem. If possible, rearrange the statements at the end of the activity so that the subscripted reference is no longer the last reference.</p> <p>PRODUCT(S) AFFECTED: CA Easytrieve Compiler Release 11.6</p> <p>Star Problem(s): EZTRVE 499</p> <p>Copyright (C) 2014 CA.
