

CA Spool 11.7
CA RS 1407 Service List

Release	Service	Description	Type
11.7	R069397	SET HORIZONTAL FORMAT IS NOT WORKING PROPERLY	PTF
	R069455	WEB INTERFACE STATUS BAR PARTIALLY HIDDEN	PTF
	R070613	VIRTUAL PRINTER MESSAGE ESF325 NOT CORRECT	PTF
The CA RS 1407 service count for this release is 3			

CA Spool 11.6
CA RS 1407 Service List

Release	Service	Description	Type
11.6	NO-SRVC	CA RS 1407 Contains No Service For This Release of This Product.	PTF
The CA RS 1407 service count for this release is 0			

CA Spool
CA RS 1407 Service List for CBQ4B70

FMID	Service	Description	Type
CBQ4B70	R069397	SET HORIZONTAL FORMAT IS NOT WORKING PROPERLY	PTF
	R069455	WEB INTERFACE STATUS BAR PARTIALLY HIDDEN	PTF
	R070613	VIRTUAL PRINTER MESSAGE ESF325 NOT CORRECT	PTF
The CA RS 1407 service count for this FMID is 3			

CA Spool 11.7
CA RS 1407 - PTF RO69397 Details

Release	Service	Details
11.7	RO69397	<p>RO69397 M.C.S. ENTRIES = ++PTF (RO69397)</p> <p>SET HORIZONTAL FORMAT IS NOT WORKING PROPERLY</p> <p>PROBLEM DESCRIPTION: When a horizontal tab stop parameter value is set to the same column position as the last byte of previous string, the horizontal tab stop parameter value is skipped and the next horizontal tab stop parameter value is used. This behavior occurs for virtual printers defined as LU type 1. A new VPSOPT=24 has been introduced to resolve this situation.</p> <p>SYMPTOMS: The horizontal tab stop parameter value is skipped and the next horizontal tab stop parameter value is used instead.</p> <p>IMPACT: Incorrect print results.</p> <p>CIRCUMVENTION: None.</p> <p>PRODUCTS AFFECTED: CA Spool r11.6 CA Spool r11.7 Star Problem(s): CSPOOL 1833 VPSOPT=23 WORKS ONLY FOR LU TYPE 3 SESSIONS</p> <p>PROBLEM DESCRIPTION: When a file is sent to a virtual printer defined as LU type 1 and no form feed data is received, the page count displayed on the Files and All Files panel of online Menu System may be lower than expected.</p> <p>SYMPTOMS: The page count for the file displayed on the Files and All Files menu of online Menu System seems too low. This can occur when multiple consecutive line feeds occur in the incoming data. By design, CA Spool will convert those line feeds to '0' or '-' carriage control. Since the page count displayed on the menu is determined to be the number of physical lines divided by the derived number of lines per page, the use of these carriage control values can cause the page count to be too low. VPSOPT=23 support for LU1 sessions has been added so that each blank line will be added to the resulting CA Spool file instead of using '0' or '-' to signify blank lines. This adjustment to the number of physical lines in the file will result in a more accurate page count in the menu system.</p> <p>IMPACT: Menu system users receive more physical pages than expected.</p> <p>CIRCUMVENTION: None.</p> <p>PRODUCTS AFFECTED: CA Spool r11.6 CA Spool r11.7 Star Problem(s): CSPOOL 1834 Copyright (C) 2014 CA.
