Release	Service	Details
12.0	RO72725	<p>RO72725 M.C.S. ENTRIES = ++PTF (RO72725)</p> <p>RMODSC TRUNCATING AFP RECORDS CAUSING APK114S ERRORS</p> <p>PROBLEM DESCRIPTION: When using the RMODSC utility to process a sequential file for collection and distribution by CA Deliver, APK114S errors occur once SARFSS begins processing the output records from RMODSC.</p> <p>SYMPTOMS: RMODSC is truncating AFP records resulting in APK114S errors during the SARFSS collection process. It appears that the lrecl and blksize are being inadvertently altered causing large AFP records to be truncated. The APK114S error is an indication that the RDW value does not match the actual length of the record.</p> <p>IMPACT: Certain AFP data files cannot be processed by the RMODSC utility.</p> <p>CIRCUMVENTION: Allow CA Deliver to process the report directly if possible.</p> <p>PRODUCTS AFFECTED: CA Deliver r12.2 CA Deliver r12.1 CA Deliver r12.0 CA Deliver r11.7</p> <p>Star Problem(s): DLVR 786</p> <p>Copyright (C) 2014 CA.
