Release	Service	Details
14.0	RO73085	RO73085 M.C.S. ENTRIES = ++PTF(RO73085) DESC(PRINTER 'S' LINE COMMAND WORKING INCORRECTLY) /* PROBLEM DESCRIPTION: The S line command on the PRINTER command display invokes the OUTPUT command if a job is active on the printer, even if the printer is not active. SYMPTOMS: A job was on a printer and the printer had a status of HALTED. Issuing an S line command invoked the OUTPUT command for the job rather than issuing a start for the printer. OUTPUT should only be invoked when a job is on a printer and the printer has a status of ACTIVE. IMPACT: Printer is not restarted with a single 'S' but requires 'START'. CIRCUMVENTION: Issue line command 'START' to start a printer that has a job on it. PRODUCTS AFFECTED: CA SYSVIEW 14.0 /*. ++VER(Z038) FMID(CNM4E00) SUP(TSE0041).
