Purpose: The TPX Administrator to verify new and modified Security SMRT values are correctly set. Relevance: One SMRT parameter "Allow Lower Case Pswds" expanded to two fields. Knowledge required: 1. The TPX Administrator will have to recycle TPX after applying the fix. 2. After applying this fix, behavior for the two fields in SMRT option(9), Security Parameters will be handled as follows on the TEN0090 panel: * Field "Allow Lower Case Pswds" will only be for passwords and not password phrases and defaults to "N". * New Field "Upper Case Pswd Phrases" will be for password phrases and defaults to "N". 3. The TPX Administrator should examine these fields to make sure they are set correctly for their site. 4. The TPX Administrator will have to reload the SMRT to activate any SMRT option(9) Security Parameter changes.) . </pre>
