CA RS 1503 - PTF RO75519 Details

Release	Service	Details
11.7	RO75519	<p>RO75519 M.C.S. ENTRIES = ++PTF (RO75519)</p> <p>ESFUSS IS MISSING SUPPORT TO SKIP THE RECORDS</p> <p>PROBLEM DESCRIPTION: It is not possible to use the User Interface exit ESFUSS to skip records while they are being written.</p> <p>In legacy data there may be a need to remove records that were used in printing protocols that are no longer in use in order to allow CA Spool to transform and print them correctly.</p> <p>When ESFUSS returns RC=2 to the caller, no action will be taken and control will be returned to the application as if the function was successful. In this way, the call to ESFWRITE can be skipped.</p> <p>SYMPTOMS: Unwanted data appears on reports.</p> <p>IMPACT: End users do not receive correct output.</p> <p>CIRCUMVENTION: If possible, change the creating applications so that the unwanted data is no longer part of the file.</p> <p>PRODUCTS AFFECTED: CA Spool r11.6 CA Spool r11.7 Star Problem(s): CSPOOL 1883 Copyright (C) 2015 CA.
