CA Cleanup for Top Secret Security 12.1  
CA RS 1506 - PTF RO80422 Details

Release	Service	Details
12.1	RO80422	<p>RO80422 M.C.S. ENTRIES = ++PTF (RO80422)</p> <p>WRONG USERID/PROFILE MAY BE KEPT ON DB MERGE</p> <p>PROBLEM DESCRIPTION:</p> <p>When running the AT6#DBU program, it is possible for the DBASE file to contain multiple DBASE file images. In this case, these multiple file images will be reduced to the most current records from each, and updated according to the input specifications and the current CA Top Secret for z/OS environment.</p> <p>Logically, these multiple file images should all be from CA Top Secret for z/OS systems 'equivalent' to the current environment. If there is not 100% equivalency between these multiple file images regarding the number of PROFILES associated with a USERID, or the number of USERIDs associated with a PROFILE, the 'duplicate' USERID or PROFILE record with the fewest associated USERIDs or PROFILES will be retained, possibly resulting in the most recently referenced USERID or PROFILE record being erroneously discarded.</p> <p>SYMPTOMS:</p> <p>Inaccurate SYSPRINT and/or CMDS output from the AT6#RPT program.</p> <p>IMPACT:</p> <p>Nonspecific depending on individual circumstances and use of CMDS generated by AT6#RPT.</p> <p>CIRCUMVENTION:</p> <p>None.</p> <p>Related Problem:</p> <p>ETCLNT 165</p> <p>Copyright (C) 2015 CA.
