CA SOLVE:Access Session Management 5.0
 CA RS 1506 - PTF RO80954 Details

Release	Service	Details
5.0	RO80954	<p>RO80954 M.C.S. ENTRIES = ++PTF (RO80954) DESC (INMC LINK HUNG IN STARTING STATE) /* PROBLEM DESCRIPTION: When an INMC link connection fails, failure notification may not be immediate. A time difference in failure notification at the two ends of the link can cause problems. If one end recognises a link failure and re-establishes connection before the other end is aware of the failure, the INMC link will hang, with one end in STARTING state and the other end ACTIVE. SYMPTOMS: One region shows a link in a state of STARTING. The other end shows the link as ACTIVE. IMPACT: The link does not recover automatically. The link must be stopped and restarted to establish communication. CIRCUMVENTION: Unlink and link to recover. PRODUCT(S) AFFECTED: CA SOLVE:Access Session Management r5.0 /* . ++VER(Z038) FMID(CC2D670) SUP(TZ58579) . /* .</p>
