

CA MIM Resource Sharing 12.0
CA RS 1603 Service List

Release	Service	Description	Type
12.0	RO87772	ABENDS0C4-04 MIMTPDRD DDN=ON CONTENTION=OFF WAITNHOLD=OFF	PTF
	RO88310	DISPLAY COUNTS=NONMANAGED INCORRECT WITH ALLSYSTEMS	PTF
The CA RS 1603 service count for this release is 2			

CA MIM Resource Sharing
CA RS 1603 Service List for CBTDC00

FMID	Service	Description	Type
CBTDC00	RO87772	ABENDS0C4-04 MIMTPDRD DDN=ON CONTENTION=OFF WAITNHOLD=OFF	PTF
	RO88310	DISPLAY COUNTS=NONMANAGED INCORRECT WITH ALLSYSTEMS	PTF
The CA RS 1603 service count for this FMID is 2			

CA MIM Resource Sharing 12.0
CA RS 1603 - PTF RO87772 Details

Release	Service	Details
12.0	RO87772	<p>RO87772 M.C.S. ENTRIES = ++PTF (RO87772)</p> <p>ABENDS0C4-04 MIMTPDRD DDN=ON CONTENTION=OFF WAITNHOLD=OFF PROBLEM DESCRIPTION: ABENDS0C4-04 Storage Protection Key violations can occur in two routines in module MIMTPDRD. The ABENDs occur when MIA Delay Detection Notification (DDN) cleanup routines return to mainline MIA code in an incorrect storage protection key. In the reported cases, DEFAULT DDN values of SETOPTION DDN=ON,CONTENTION=OFF, WAITNOHOLD=OFF, which enable internal DDN Delay Detection processing but disable DDN Delay Notification, were in effect. SYMPTOMS: The MIM address space, in which MIA DDN is active, abends with an ABEND SOC4 Reason=00000004 at MIMTPDRV.MIMTPDRD offsets 0D02 or 0EDE. IMPACT: The MIM address space, in which MIA DDN is active, terminates. Until the abending MIM address space is restarted, tape allocation delays can result in missed Service Levels. If the abending MIM address space is a combined MIA/MII address space, integrity exposures can occur in addition to tape allocation delays. The MIM Address space should be restarted as soon as possible. CIRCUMVENTION: A circumvention of this problem can be achieved by disabling DDN in active MIM address spaces until the correcting APAR/PTF can be applied. DDN can be disabled by issuing a SETOPTION GTAF DDN=OFF command on each system in which MIA's DDN is active. The MIMCMNDS parmlib member should also be updated to specify SETOPTION GTAF DDN=OFF for future restarts until the corrective APAR/PTF becomes available and can be applied. PRODUCT(S) AFFECTED: CA MULTI-IMAGE MANAGER Release 12.0 CA MULTI-IMAGE MANAGER Release 12.1 Related Problem: MIA 153 Copyright (C) 2016 CA. All rights reserved.
