Release	Service	Details
12.7	RO91990	<p>RO91990 M.C.S. ENTRIES = ++PTF (RO91990)</p> <p>EXTRACT/PRINT ENHANCEMENTS</p> <p>PROBLEM DESCRIPTION:</p> <p>JARSSM 360</p> <p>This change introduces three new features to the EXTRACT and PRINT Control statements in CA SMF Director. These changes do not affect any current functionality, but can be used to facilitate the use of EXTRACT and PRINT.</p> <p>The new features come about in the form of new operands on the control statements.</p> <p>Feature 1 - SDAY Override</p> <p>A new SDAY operand on EXTRACT and PRINT allows customers to override the default SDAY value set on configurations in the SCDS. This allows for a different day start on an ad-hoc basis when obtaining SMF data from the archive.</p> <p>Feature 2 - Relative Days Ago</p> <p>New FROM and TO style operands are provided to allow customers to set up a regular extract for days in the past. The new operands are FROMDAYSAGO and TODAYSAGO. These operands are used together to describe a range of days from the current day and, like FROM and TO, support a time value as well. Valid day ranges are from 0 to 366.</p> <p>Feature 3 - New Logical Time Operands and Aliases</p> <p>New aliases for existing operands on EXTRACT and PRINT are provided. Additionally the new operand LASTYEAR is provided:</p> <p>LASTWEEK - Alias of LWEEK  LASTMONTH - Alias of LMONTH  LASTYEAR - New Operand</p> <p>These aliases are provided to make the time range operands more self-documenting.</p> <p>SYMPTOMS:</p> <p>None. This is new functionality.</p> <p>IMPACT:</p> <p>Customers have to set up these time ranges manually in their control statements for each extraction run.</p> <p>CIRCUMVENTION:</p> <p>All of time range values these operands provide can be hard coded using the existing TO/FROM operands with the values they would generate.</p> <p>ENHANCEMENT DESCRIPTION:</p> <p>This enhancement will enable customers to more easily access their SMF data from the CA SMF Director Archive.</p> <p>PRODUCT(S) AFFECTED:</p> <p>CA SMF Director R12.7</p> <p>Related Problem:</p> <p>JARSSM 360</p> <p>Copyright (C) 2016 CA.
