The CA RS 1705 service count for this FMID is 1			

CA PDSMAN PDS Library Management 7.7  
CA RS 1705 - PTF RO95384 Details

Service	Details
RO95384	<p>RO95384 M.C.S. ENTRIES = ++PTF (RO95384)</p> <p>FASTCOPY FULL LIBRARY COPY OF PDSE GENERATIONS</p> <p>PROBLEM DESCRIPTION:</p> <p>IBM APAR OA42358 (PTF UA71462) enhances PDSE data sets to allow a user to save a fixed number of previous generations for each member. This is referred to here as IBM PDSE Generations.</p> <p>This enhancement to FastCopy provides support to copy PDSE previous generations under the following circumstances:</p> <ol style="list-style-type: none"> <li>1) The operation is a full library copy with no SELECT or EXCLUDE statements present.</li> <li>2) Both input and output libraries are PDSE.</li> <li>3) The input library has at least one previous generation member present.</li> <li>4) The ',RESET' keyword must be specified on the COPY statement. This is enforced for the following reasons: <ul style="list-style-type: none"> <li>* The IBM facility used to perform the full copy (FAMS) empties the library.</li> <li>* The PDSE data set version will be forced to 2, if not already set to 2.</li> <li>* The MAXGEN= attribute is set by FAMS to be the same as that specified for the input library.</li> </ul> </li> </ol> <p>PDSE previous generation members are not copied when the operation specifies SELECT or EXCLUDE statements.</p> <p>The EZYEDIT CLONE command is also modified to copy PDSE previous generation members when an input contains them and the output is a PDSE.</p> <p>SYMPTOMS:</p> <p>PDSMAN FastCopy does not copy IBM PDSE previous generation members.</p> <p>IMPACT:</p> <p>The following new messages are issued when a PDSE generations copy operation is performed:</p> <pre>FCO119I FULL LIBRARY COPY WITH PDSE GENERATIONS HAS BEEN PERFORMED</pre> <p>This message indicates a full PDSE library copy operation that includes previous generations has been performed.</p> <pre>FCO182U PDSE PREV GENS INPUT (MAX/CT):      5/      2 OUTPUT (MAX/CT):      5/      2</pre> <p>The PDSE MAXGEN setting and the count of previous generations is reported for both the input and output libraries (the input and output numbers are normally the same).</p> <p>Only current member names are reported using the FCO141I message.</p> <p>CIRCUMVENTION:</p> <p>None</p> <p>ENHANCEMENT DESCRIPTION:</p> <p>PRODUCT(S) AFFECTED:</p> <p>CA PDSMAN PDS Library Management <span style="float: right;">Release 7.7</span></p> <p>Related Problem:</p> <p>PDSM 1051</p> <p>Copyright (C) 2017 CA.
