Service	Details
R093756	<p>R093756 M.C.S. ENTRIES = ++PTF (R093756)</p> <p>CA TLMS VERSION 14.0 - INCREMENT 2 (INC02)            ENHANCEMENT DESCRIPTION:            This PTF updates CA TLMS 14.0 to the Increment 2 (INC02) level.            This PTF provides support for the following enhancements:            - A Dynamic rebuild of the VMF Index (VMI) while tape processing is active on all LPARs. TLMS LPARs are switched from the current hlq.VMI to a new hlq.VMI.N. After the rebuild hlq.VMI is renamed to hlq.VMI.0 and hlq.VMI.N is renamed to hlq.VMI. The new hlq.VMI is rebuilt from the VMF and has index records matching the VMF.            - New CATVMILP utility to print the VMF Index (VMI) while CTS/TLMS is active.            - A new utility to cleanup VMF "orphan chains" while tape processing is still active. This will ease the VMF cleanup needed for Dynamic VMF extend.            - The genlevel for CA TLMS 14.0 is changed to " " to indicate that this is the last planned incremental PTF. CA TLMS 14.0 was delivered as part of the Incremental Release Program which provides for the incremental delivery of new features to participating customers.</p> <p>PRODUCT(S) AFFECTED:            CA TLMS MVS Tape Management Version 14.0</p> <p>Related Problem:            TLMS 951</p> <p>Copyright (C) 2017 CA.
