CA Vantage Storage Resource Manager 14.0
 CA RS 1706 - PTF RO96064 Details

Service	Details
RO96064	<p>RO96064 M.C.S. ENTRIES = ++PTF (RO96064)</p> <p>MA UNEXPECTED FUNCTION BEHAVIOR</p> <p>PROBLEM DESCRIPTION:</p> <p>Message Automation Scripts can have one of the values for shutdown time action, such as SHUTDOWNACTION=DISCARD/EXECUTE/SAVE . Control to Event Procedures of CA Vantage Message Automation Scripts is given when the value of MAX_COUNT=n is satisfied. The Value EXECUTE gives control to Event Procedure during the shutdown of automation component (F SAMS,DEACT,AUTO or F SAMS,STOP) if any messages are accumulated. For Example: If the MAX_COUNT=2, when two messages accumulate the script performs related action. Script performs the same action when the automation component or CA Vantage task stops.</p> <p>This fix introduces an advanced behavior in which the message automation can recognize if the Even Procedure is already executed on the same or identical data. Message automation script performs Event Procedure SHUTDOWNACTION=EXECUTE only if the new messages are accumulated/counted. In the given example shutdown execute SHUTDOWNACTION=EXECUTE will be performed only if one message will be accumulated for MAX_COUNT=2.</p> <p>SYMPTOMS:</p> <p>None</p> <p>IMPACT:</p> <p>Message Automation Scripts actions are done twice.</p> <p>CIRCUMVENTION:</p> <p>None</p> <p>PRODUCT(S) AFFECTED:</p> <p>CA Vantage SRM + CA Vantage GMI Version 14.0</p> <p>Related Problem:</p> <p>VANT 9815</p> <p>Copyright (C) 2017 CA. All rights reserved. R00071-CTU140-SP1</p> <p>DESC(MA UNEXPECTED FUNCTION BEHAVIOR). ++VER (Z038) FMID (CCTUE00) SUP (TR96064)</p>
