YES creates these index records. NO does not create these index records. Administrators can change this setting from YES to NO at will. Reports that are archived while JOBMODE=YES can be viewed in JOB mode. Reports that are archived while JOBMODE=NO cannot be viewed in JOB mode. When users access archived reports in JOB mode, they see one of the following options: .all archived SYSOUT, if the report was archived while JOBMODE was set to YES .no data, if the report was archived while JOBMODE was set to NO. If you change JOBMODE from YES to NO, creation of JOB mode index rec- ords stops; however, existing JOB mode records are not deleted. These records are deleted when the associated report instance is deleted. Syntax: JOBMODE =YES NO Default: NO ).</pre>
