eHealth 6.3.2.06? (Oracle 11g)	DCIM solution 5.0.00	ecoMeter 5.0.00	CA VI 5.0.00	No

There are very specific versions of CA eHealth that are supported by a version of CA ecoMeter.

This is due to three main reasons:

1. CA eHealth Certifications that need to be coordinated between the two products
2. Differences between Oracle 10g and Oracle 11g
3. QA testing and verification

NOTES:

- The currently released version of eHealth r6.3.2.05 is not yet supported.
- An eHealth/ecoMeter installation on an unsupported version may seem to be working, but there will be various low-level issues that will not work and cause subtle issues.
- Please install the HeartBleed patch provided in the BOM.
